**AUTO AIR HIGH  
PERFORMANCE  
AIR ELIMINATOR**

**BULLETIN 175  
(5-19)**

## **AUTO AIR HIGH PERFORMANCE AIR ELIMINATOR**

- 4 Times the flow of comparable air eliminators
- All stainless steel construction
- 100% U.S. Made
- Replaceable soft seat (not metal-on-metal)
- Fully rebuildable
- 150 psi operating pressure - 750 psi proof pressure
- Compound lever-in-lever mechanism

**GTP-9636**

Releasing air from a filter vessel is critically important both to allow full utilization of the filter element and to reduce the risk of internal static fires. Our new Auto Air releases 4 times the air of similar air eliminators and is fully rebuildable. It also works at up to 150psi. The heart of the design is our new double lever mechanism (patent applied for) that allows the use of a larger orifice.

The standard unit has a 3/4" NPT inlet and outlet. If you require BSP, just add that to the part number.

**DIMENSIONS:** 7in (17.8cm) tall, 6 1/2 in (16.6 cm) top flange
