

KAMLOK® & AUTOLOK®

**THE ONLY STAINLESS-STEEL QUICK CONNECTS
WITH A VIBRATION-PROOF LOCKING-ARM DESIGN AND SPRING RINGS.**

**STAINLESS
STEEL**

Upgrade your hose offering with the best cam-and-groove design.

Packed with features the competition just can't match. OPW's Kamlok® and Autolok® are industry standards for good reason. Both are manufactured from 316 stainless steel and feature our exclusive Twin-Kam™ arm design that prevents accidental release under vibration. And unlike the competition, our Spring Ring™ finger rings stay in position, facilitating connection of your system. Autolok adds an extra level of protection with self-locking arms.

Why The Best Cam-and-Groove Design?

Kamlok	Autelok	FEATURE	BENEFIT	
		Vibration-Proof Twin-Kam The exclusive Twin-Kam design contacts the groove on the adaptor to prevent accidental release. 	OPW  Arms catch at 45 degrees and keep your system connected 	COMPETITORS Arms will eventually fall and disconnect your system 
		Spring Ring The only rings that spring back into neutral position so they remain parallel with the arms. 	Rings consistently facilitate connecting and disconnecting your system 	Rings curl under or over arms, obstructing connection or disconnection 
		Good for Life We stand by our Kamlok/Autelok product as quality 316SST. If the arms are damaged, we'll send you a repair kit—for free. 	Rugged and unbreakable arms 	Competition arms can be bent or broken 
		Locking Arms Our arms are locked and unlocked in one smooth motion. No need to use a pin or struggle with an extra step to connect and secure your system in the field (with greasy gloves). 	Facilitates connection and disconnection while adding another layer of safety 	Other arms require more steps
