

MAESTRO®

52 - 80 - 100

 **IEMCA**

MAESTRO[®]

PERFECTION IS AN ATTITUDE

The MAESTRO[®] is a range of automatic bar feeders for bars from 10 to 100 mm for fixed headstock lathes. Ideal for those who require high performance and the utmost flexibility.

 **IEMCA**

A HISTORY OF SUCCESS

People, Skills, Innovations and Investments have made IEMCA the Worldwide LEADER

1966

Model A

The first IEMCA bar feeder, model A, is officially presented at Milan's Trade Show.

1973

Model T

First bar feeder in the world equipped with **multi-rack and bundle magazines**, for 5 times greater production autonomy.

1983

TAL

First bar feeder in the world equipped with **lubrication** inside the guide channel.

1994

SIR

First integral bar feeder for multi-spindle lathes equipped with **guide channels of variable diameter**, thanks to the use of "sprockets" (IEMCA patent).

2007

ELITE

Bar feeder for small diameter bars destined to become **the benchmark** for micromechanics.

1971

Model CS

First bar feeder for sliding headstock able to machine **bars of 0.8 mm** diameter.

1979

PRA

First bar feeder in the world for multi-spindle lathes equipped with a revolutionary patent: the "double bar pusher" or "**pre-feeding**".

1991

BOSS

First bar feeder with full **electronic** control that redefines market standards.

1998

MASTER

Bar feeder for machining **bars up to 80 mm** diameter.

1961
FOUNDING

4
PRODUCTION PLANTS

550
EMPLOYEES

+120.000
INSTALLATIONS

90
COUNTRIES

2013

BOSS HD SUPERFAST

The SUPERFAST platform reduces bar changeover time up to **37%** and cuts the headstock idle times to **zero**.

2017

SIR HEAVY DUTY

The perfect combination of: machine life cycle cost minimization, extreme flexibility and productivity maximization.

2018

MAESTRO® 80

Automatic bar feeder for **10 to 80 mm** bars for lathes with fixed headstock, to achieve very high performance and the utmost flexibility.

2020

NEXT 42 SLIDING

A machine unlike any other: the first multi-spindle bar feeder with sliding headstock, made to work alongside the DMG MORI MULTISPRINT multi-spindle lathes.

2009

MASTER HF

Hyper-Flexible technology for machining bars between 15 and 80 mm diameter without changing the guide channel.

2016

INDUSTRY 4.0

IEMCA bar feeders are the only ones in the world to provide Industry 4.0 technology: warning messages in case of alarm, telecontrol, teleservice, remote connection with other systems, etc.

2018

ELITE ZERO

The first bar feeder in the world for micromechanics, able to feed **0.3 mm** bars.

2018

UNIQA 42 HIGH PERFORMANCE

The machine tool for **preparing bars** with a diameter of 12 – 42 mm.

2021

MAESTRO® 52

Automatic bar feeder for bars from **10 to 49 mm** for fixed headstock lathes, to achieve very high performance and the utmost flexibility.

CONSTANT INVESTMENTS IN RESEARCH

To always be Pioneers in automation

MAESTRO® feeders are made in the IEMCA plant in Faenza, Emilia Romagna, Italy. It is the largest bar feeder plant in the world with an available surface area of more than 25,000 sq.m. More than 200 people work in this location everyday to develop new innovative technologies.

IEMCA has always been working to develop innovative solutions for the end users and to improve its products in terms of productivity, design, physical and cognitive ergonomics. IEMCA has always been working to develop innovative solutions for the end users and to improve its products in terms of productivity, design, physical and cognitive ergonomics. IEMCA works in cooperation with leading Italian Universities and Research Centers and is the technical partner of reference for machine manufacturers who aim to provide the final user with the best technological solutions.

INNOVATIVE SOLUTIONS

50 DESIGNERS

35 ACTIVE PATENTS

RESEARCH CENTERS

RESEARCH CENTERS

THE FLEXIBLE SOLUTION FOR FIXED HEADSTOCK LATHES

Unrivalled productivity, flexibility and ergonomics

MAESTRO® 52

Ø10 - 49 mm
Space-saving

MAESTRO® 80

Ø10* - 80 mm

MAESTRO® 100

Ø10* - 100 mm

The MAESTRO® bar feeder range is the best possible synthesis of:

- Productivity maximization
 - Great flexibility
 - Physical and cognitive ergonomics
- all with a new, modern DESIGN.

ABACOS®

Adaptive BAR COntrOl System

ABACOS is a IEMCA patented system consisting of self-adjusting bushings that adapt to the bar being machined, with no need for the operator to carry out manual adjustments or set the diameter on the HMI.

ABACOS is able to carry out different operations at the same time:

- Guide the bar
 - Dampen the bar vibrations via a pneumatic system
 - Tighten the bar pusher
- all without changing the guide channel.

ABACOS allows to machine shaped bars (e.g. hexagonal), by installing specially sized bushings on the bar diameter. It is fitted with a special lubrication circuit that reduces friction between the self-adjusting bushings and the bar.

PRODUCTIVITY MAXIMIZATION

Get the best from your lathe by choosing IEMCA

The MAESTRO® bar feeder range sets no limits to your desire for efficiency. It allows to:

Reduce retooling time
almost to zero

Minimize bar change
time to 31 seconds*

Reach the maximum speed
allowed by your lathe with
every configuration

To change the diameter of the bar to machine, simply set the new diameter on the operator panel and the bar magazine will self-adjust automatically.

MAESTRO® has been conceived and designed in cooperation with CREE certified ergonomists to be at the service of the operator, in compliance with international physical and cognitive ergonomic standards. Ergonomics are now combined with a new modern design.

[*] Data referred to real situations.

A MAGAZINE FOR EVERY NEED

Single-rack, UP and Open Access Bundle

Single-rack Magazine

- Equipped with an auxiliary bar loading system
- Autonomy: 290 to 330 mm of useful surface

UP Magazine

- Can be loaded manually, with a IEMCA trolley, a forklift, a transpallet or a bridge crane
- Autonomy: 500 mm of useful surface (extendable up to 790 mm)

Open Access Bundle Magazine (OAB)

- Can be loaded with a IEMCA trolley, a forklift, a transpallet or a bridge crane
- Autonomy: 2,500 kg

SINGLE-RACK MAGAZINE
290 to 330 mm of useful surface

UP MAGAZINE
500 mm of useful surface (extendable up to 790 mm)

OAB MAGAZINE
2,500 kg

CLOSER THAN EVER BEFORE!

Minimum installation distance

MAESTRO® is the bar feeder with the shortest installation distance. Thanks to the ABACOS system, it is possible to use short bar pushers thus reducing the installation distance between bar feeder and lathe.

AXIAL SHIFTING

Axial shifting* is the optimal response to operator needs.

FAST

The operator just needs to operate a lever to control the shifting with no need for tools.

COMPACT

No obstacles on the floor.

ERGONOMIC

The operator starts the shifting while standing near the machine with no need to carry out other operations at floor height.

CLEANLINESS AND SILENT OPERATION

That's what we want for your production areas!

MAESTRO® 80 has been designed to maximize working comfort in your production areas, creating the optimal environment for productivity.

- in 1983 IEMCA was the first to introduce lubrication in the guide channel. We have put our 35 years of experience in lubricant management into this project, with the aim of reducing leaks thanks to a new enlarged tank, a completely closed beam and a splash guard.
- The design of the machine is modern and attractive and was especially conceived by IEMCA to hide the cables inside avoiding to leave them visible on the ground.
- IEMCA has optimized acoustic comfort by reducing the machine noise throughout the work cycle: this has been achieved with careful design of the guards and studies on the guides material.

ACOUSTIC COMFORT

Thanks to the special attention put into the design of the guards and in-depth studies on the material from which the guides are made, IEMCA has reduced the noise emission levels of the machine during the work cycle.

The cables are hidden inside the feeder to keep them out of sight and off the ground.

The new tool box* can be used by the operator to conveniently store IEMCA accessories.

A new larger tank, a completely closed beam and a splash guard reduce oil leakage

INDUSTRY 4.0 OPERATOR INTERFACE

The future is now

The 7" **operator interface** has special functions that make the machine extremely easy and intuitive to use. The operator can view in real time the operation of the ABACOS bushings throughout the work cycle. The "one touch" feature facilitates the operator: it is in fact possible to carry out multiple operations with just one touch. Work programs can be stored and easily recalled if needed. The bar feeder keypad can be re-installed on the lathe control panel.

In January 2017 IEMCA is the first company in the world producing bar feeders to deliver Industry 4.0 machines.

IEMCA devices are able to acquire and share data with other machines and production systems of the customer user, contributing to the constant improvement of production processes.

Send e-mails and texts in case of alarm on the machine

Telecontrol and remote control

IEMCA SUPPORT WILL HELP KEEP YOUR MACHINE OPERATING AT 100%

WORLDWIDE SUPPORT

IEMCA customers can count on the support of more than 150 technicians for prompt intervention on site, phone support and spare parts.

Preventive maintenance: IEMCA technical experts support the end user keeping the bar feeder in healthy operating condition for years.

Recommended spare parts: the end user can contact the IEMCA network and get convenient and original spare parts packages.

| Max bar weight | 180 kg | |
| Max remnant length | Ø10 ÷ 65 mm = 400 mm Ø66 ÷ 80 mm = 250 mm | Ø10 ÷ 65 mm = 400 mm Ø66 ÷ 100 mm = 250 mm |
| Min remnant length | 110 mm | |
| Bar changeover time* | Ver. 32 - 31 s · Ver. 37 - 33 s · Ver. 42 - 35 s | |
| Operating voltage | 230 / 400 Volt | |
| Operating voltage | 50 / 60 Hz | |
| Control voltage | 24 Volt A.C. - 24 Volt D.C. | |
| Installed power | 2 kW | |
| Oil quantity | 115 L | |
| Air pressure | Min. 6 bar | |
| Air consumption | 65 NI/bar change | |
| Bar feeder weight | Ver. 32 - 2280 kg · Ver. 37 - 2365 kg · Ver. 42 - 2480 kg | |

*Please contact IEMCA to correctly define the minimum diameter of workable bar.
**The table contains purely indicative data.
Different factors such as length and material of the barstock, and some of the parameter settings by the operator, can affect the time significantly.

BUCCI INDUSTRIES

People, Passion, Technology!

The BUCCI INDUSTRIES GROUP is worldwide leader in two sectors: in industrial AUTOMATION & ROBOTICS and advanced COMPOSITE MATERIALS.

In the automation industry, Bucci Industries operates with the following brands:

IEMCA: worldwide leader in the design and production of bar feeders (www.iemca.com)

GIULIANI: leader in the industry of high-productivity and high-flexibility machine tools and transfer machines (www.giulianimachines.com)

SINTECO: leader in the field of automation and robotics for assembly applications and in the management of medicine unit doses in hospitals (www.sintecorobotics.com)

VIRE: benchmark for the packaging of hygiene products (www.vire.it)

Bucci Industries operates with the brand **BUCCI COMPOSITES** in the design and production of advanced composite materials, primarily carbon fibre (www.bucci-composites.com)
